PORTFOLIO: premkumar-portfolio.vercel.app

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of hands-on experience building responsive, pixel-perfect web applications in React.js, JavaScript (ES6+), TypeScript, HTML5 and CSS3, translating Figma and UI/UX designs into production-ready, reusable component libraries. Strong in React Hooks, Redux, React Router and Tailwind CSS, with hands-on Node.js/Express.js REST API development and integration for end-to-end feature delivery. Optimises front-end performance through code splitting, lazy loading and bundle-size reduction, ensures cross-browser and mobile-first compatibility, and works in Agile/Scrum teams with Git workflows, code reviews and CI/CD deployment.

TECHNICAL SKILLS

Frontend: Figma, React.js, Next.js, JavaScript, TypeScript, HTML, CSS, SCSS, Tailwind CSS, Bootstrap

Backend: Python, Node.js, Express.js, RESTful APIs, Socket.io, JWT

Database: MongoDB, SQL, Supabase, MariaDB, PostgreSQL

Tools & Practices: Git, GitHub, CI/CD, Postman, Jest, Docker, Kubernetes

DevOps: AWS, Cloudflare, Google Cloud, Hostinger, Vercel

AI Tools: GPT, Antigravity, Claude, Cursor, GitHub Copilot

PROFESSIONAL EXPERIENCE

JANUARY 2025 - CURRENT

Full Stack Developer | Sri Manakula Vinayaga Group of Institutions | Puducherry

- Own front-end delivery, with supporting backend APIs, for 6 production web applications serving 500+ daily active users across healthcare and education workflows.
- Translated Figma designs and UI/UX specifications into pixel-perfect, responsive React.js and TypeScript interfaces using Hooks, Redux, Context API and React Router, with role-based protected routes and mobile-first layouts in HTML5, CSS3 and Tailwind CSS.
- Established a shared, reusable TypeScript component library (forms, tables, modals, dashboards) with consistent design tokens, plus a Jest unit and component test suite, keeping look-and-feel consistent across all 6 applications.
- Built a real-time appointment booking UI over WebSockets showing live slot availability without client-side polling, backed by a FastAPI and PostgreSQL service with row-level transactional locking so only one patient wins a contested slot.
- Integrated versioned REST APIs (Node.js/Express.js and FastAPI) into React clients with typed API modules, loading/error/empty states, client-side form validation and idempotent retries; documented every endpoint with OpenAPI/Swagger.
- Improved reporting dashboard response times by approximately 70% through cursor-based pagination, composite indexing and N+1 query elimination, with Redis caching on hot read paths.
- Hardened front-end and API security with short-lived JWT access tokens, role-based access control, XSS-safe rendering, server-side input sanitisation and CORS/CSP configuration.
- Containerised services with Docker and deployed to Google Cloud and AWS through CI/CD pipelines; primary on-call responder fixing UI bugs, API timeouts and expired-session loops the same day.
- Reviewed pull requests and mentored 3 junior developers on React component patterns, state management and Git workflow.

JUNE 2024 - DECEMBER 2024

Junior Full Stack Developer | Heyram Infrastructure Pvt. Ltd | Chennai

- Shipped client MERN web applications across e-commerce, real estate and service sectors, converting client mock-ups and Figma designs into live, responsive websites.
- Delivered a production e-commerce web application in React.js, Node.js/Express.js and MongoDB covering product catalogue, JWT authentication, cart, checkout, order lifecycle and admin dashboard, with Redux state management and React Router navigation.
- Built responsive, cross-browser landing pages and dashboards in HTML5, CSS3 and JavaScript (ES6+) matched to client design files, tested across Chrome, Firefox, Safari and mobile viewports.
- Reduced initial JavaScript bundle size by 30% through Webpack code splitting and route-level lazy loading, cutting time-to-interactive on low-bandwidth mobile connections.
- Integrated third-party payment, transactional email and content APIs with explicit timeout, retry and failure-state handling.
- Carried client websites from first commit to live domain, covering CI/CD automation, DNS and SSL configuration and uptime monitoring, and remained the escalation point after handover.

KEY PROJECTS

AI IGNITE — GENAI HACKATHON PLATFORM · REACT · TYPESCRIPT · NODE.JS · MONGODB

- Led the platform as Point of Contact Coordinator and built the participant-facing UI and organiser admin panel in React and TypeScript, covering registration, team formation, mentor slot booking and LLM-assisted submission evaluation.
- Secured access with Google and GitHub OAuth, JWT session handling and XSS-safe token storage, giving organisers live control over team formation and mentor scheduling during the event.

SMV MEDIA — INTERNAL WORKFLOW AUTOMATION SUITE · REACT · NODE.JS · PYTHON · GOOGLE CLOUD

- Replaced manual media-operations tracking with a role-based web dashboard featuring event-driven notifications and reporting views backed by SQL and MongoDB queries.
- Operated on Google Cloud with CI/CD pipelines, environment configuration and production monitoring.

EDUCATION & CERTIFICATION

SEPTEMBER 2023 - MARCH 2024

Certification: MERN Stack Developer Program

Guvi Geek Technologies (IIT-Madras incubated) · React.js, Node.js, Express.js, MongoDB, HTML5, CSS3, JavaScript (ES6+), REST APIs

2019 - 2023

B.Tech: Mechanical Engineering

Sri Venkateshwaraa College of Engineering and Technology, Puducherry · CGPA: 7.6
